Adding RedShelf to Your Blackboard Learn Course

RedShelf is the Supe Store's provider for the Access Granted program. If you are offering an eBook or coded courseware product, the RedShelf tool will act both as the delivery of the content as well as the opt out functionality. If you are offering a codeless courseware product than the tool will only be the opt out functionality.

To add RedShelf to your Blackboard Learn course, select the Content Area where you'd like the RedShelf tool link to be added. Click "Build Content" and scroll down to RedShelf.

"Please note, if there is no Content Area in your course, you may have to build the area before you can add the RedShelf Tool. If you have the Content Area, please proceed with adding the RedShelf tool using the Build content button.

- Click on the plus sign in the circle in the top left corner of the left-hand side menu.
- Choose the Content Area.
- Name Content Area and a checkbox that says Make Available to Users.
- The new link is added to the bottom of the menu--click on it to go to the new content area.

This will open the Create RedShelf dialog. Provide an entry in the Name field and click submit. Name the tool "Access Granted- Provided by RedShelf" and under Description type- Click here for your book.

*******Important if you merge sections to create a super-section:

If you merge your course sections into a super-section within Blackboard it will change the identifier needed to connect the two systems. Please feel free to do so if you wish, just once you do please send me a quick email notifying me that you have merged your sections and I will get it corrected. If this is not corrected, students will not have access until it is corrected.
